

Long term project

Tasks

Create frontend Vue.js page for dealing with CRUD users and add/remove group operations - communicating with mock API;

Frontend

Frontend project will be provided for adding new user management pages.

Requirements

Use the provided vue.js admin dashboard template

Paginated user list

Multi row selecting for delete users

Create/update page with multi value combobox for subgroups

Complete template project will be sent after project start (<https://cruip.com/demos/mosaic/>)

Prereqs

- Node v18
- VueJs v3+
- Vite

The project already exists. Not necessary project setup.

After project starts

- I will provide postman collection with mock server;
- frontend project;
- frontend template/material design;
